RBI Maintains Repo Rate at 5.25%

Ahmedabad, Commenting on the Reserve Bank of India's latest monetary policy announcement, Hemant Sagare, Director – Ratings, Brickwork Ratings, said that the RBI's decision to maintain the repo rate at 5.25% reflects its continued focus on striking a balance between inflation management and sustaining economic growth. According to Sagare, The RBI maintained its stance of keeping the repo rate unchanged at 5.25%. This supports its efforts towards a continued balance between inflation and resilient growth. The guidance on GDP growth rates was revised to 6.6% from 6.9%, given that prolonged global supply chain disruptions, volatility in global financial markets, and weather-related shocks continue to pose downside risks to the domestic growth outlook. The growth outlook, though moderated, remained resilient, given the growth in the manufacturing and services sectors during the first two months of FY27. The revision in growth rate estimates accounted for the external vulnerabilities rather than the domestic factors. The regulator has attempted to resolve it by incentivising the external demand. The long-term G-sec investments for tenors of 15, 30, and 40 years by the foreign portfolio investors (FPIs) under the Fully Accessible Route (FAR) will enhance capital and support its retention.
