Lease Agreement Breach by Global Discovery School

Ahmedabad, Global Discovery School, located at Ampad near Sevasi in Vadodara taluka, has become embroiled in a dispute. Due to the breach of conditions of the lease agreement executed between the school trust and the landowners, the Arbitration Centre (Arbitration Court) had, in October last year, ordered the trust to vacate the school premises by May 31, 2026, and hand over possession to the other party to the lease agreement. In addition, the Arbitration Court (Mediator) had directed the school trust to pay more than Rs. 3.68 crore in outstanding rent to the landowners along with 9% interest within two months. As per the lease agreement, the trust was required to pay the land rent to the land and building owners on the 7th of every month based on the agreed building rent calculated on a building area of 29,543 square feet. Even after the lease agreement was executed, the trust failed to make timely payments and did not conduct financial and other dealings appropriately. Consequently, in 2018, the landowners issued (18-2)

Salesforce Expands Agentforce Voice with Hindi Language Support

Ahmedabad, Salesforce, the global leader in AI CRM, today announced the launch of Agentforce Voice in Hindi, a significant step in making agentic AI more accessible and relevant for India's diverse, multilingual landscape. The new Hindi voice capability enables businesses to engage customers in one of India's most widely spoken languages, while giving teams greater control over AI agent actions through deterministic guardrails - helping deliver more natural, inclusive, trusted, and comprehensive customer experiences at scale across Bharat.

While traditional voice tools rely on rigid decision trees, Agentforce Voice in Hindi represents a fundamental shift toward autonomous agency. Built on Salesforce's trusted Agentforce platform, Agentforce Voice brings together conversational AI, enterprise data, and business workflows to help organisations move beyond simple voice assistance toward intelligent, action-oriented customer engagement. With built-in controls, guardrails, and deterministic actions, businesses can define how AI agents operate, when they act, and where human oversight is required - helping to ensure that customer interactions remain secure, consistent, and aligned with enterprise policies. The platform is engineered to understand natural code-switching between Hindi and Hinglish (Hindi + English). And rather than just transcribing speech, the system performs action-oriented reasoning to facilitate complex tasks. (1-7)
